Hello! This is **Protext.** Protext first appeared on the Amstrad CPC in 1985, then made its way through several systems and versions until the final PC version in 1995. In 2008 it was revised slightly, and released as freeware. You can download it from here:

http://www.tigerteam.co.uk/protext/

It's still a fast and capable word processor, if you don't mind working with mid–1990s DOS character sets.

«*Je respons ordinairement à ceux qui me demandent raison de mes voyages: que je sçay bien ce que je fuis, mais non pas ce que je cerche.*»
 – Michel de Montaigne, *Les Essais* Book 3, Chapter 9.

(translation: *To those who ask why I travel, I usually reply: 'I know well what I flee from, but not what I am in search of.'*)
