

Jules Bourgoïn's *Les éléments de l'art arabe: Le trait des entrelacs* (1879; available on [archive.org](http://archive.org)) is a classic reference for geometric patterns. Six of these patterns (Bourgoïn plates 1b, 17, 12, 18, 43 and 171) have been re-drawn here for you to colour in and enjoy.

**Stewart C. Russell** is a Toronto-based Scottish engineer who *really* enjoys making patterns.
